CEDAR RIDGE®

## CEDAR RIDGE® STANDS UP TO ITS NAMESAKE.

With Cedar Ridge® exterior siding, you can take your creative ideas to the edge – and beyond. Cedar Ridge offers an endless array of cladding styles, colors and textures so you can mix, match and create a home exterior that's uniquely you. Experiment with these exciting shapes, lines, colors and finishes to create contrasting, harmonious, or one-of-a-kind designs that make a home your pride and joy.

The unique hand-milled cedar woodgrain finish of Cedar Ridge is as natural as its high performance features. It's 240% more impact resistant than fiber cement, and reduces noise up to 45%. Cedar Ridge is virtually maintenance-free, never needs painting and is able to withstand hurricane-force winds up to 200 mph. And you'll enjoy the seamless appearance of your home for a lifetime — thanks to Cedar Ridge's core backing system, which straightens wall imperfections and fortifies windows and corners.

## TRUE TO ITS ROOTS.

Cedar Ridge offers an array of siding options, including sideboard plank that mirrors the look of conventional wood siding with its hand-milled cedar woodgrain and radiant low gloss finish.

Wideboard Plank

Shake and Shingles

Board & Batten

## INNOVATION THAT LEADS TO LONG-TERM SAVINGS.

Cedar Ridge's graphite-enhanced EPS insulation is made with Neopor® an ingredient from BASF SE which is engineered to reduce thermal conductivity – or the flow of hot and cold air through the wall cavities. It also aids in the absorption and reflection of radiant heat.

With the addition of Neopor, the R-value of Cedar Ridge siding is now up to 19% higher than traditional insulated siding\* for greater energy efficiency and money savings.

This unique insulation system is made with ridges that allow moisture to evaporate while the channels guide any extra moisture down and away from your home.

\*R-value varies by profile.

® = registered trademark of BASF SE

## HIGH PERFORMANCE COMES NATURALLY.

### T6, D7, Quad 4 and Quad 4.5 Dutchlap
