**1** Look for color palette ideas in your surroundings, including landscaping, trees and gardens in your neighborhood and the larger area where you live. The colors you pick for your interior walls can also influence your exterior walls.

**2** You may be inspired by your neighbors' color schemes, but it is a good idea to avoid copying them exactly and best to create your own unique combination that sets your home apart. In most cases, you want your home to fit in but not clash with nearby buildings.

**3** You need to first consider the appearance of any features on the home that will remain unchanged and harmonize your siding color with them. This includes roofing, masonry, stone, stairways, doors, etc.

**4** If your home's architectural style is very distinct (Colonial, Greek Revival, etc.) you will get best results if your color selection and treatment complements its original design.
