# ENGINEERED TO IMPRESS.

With over 20 years of successful performance, it's easy to see why the LP® SmartSide® brand is one of the fastest-growing brands of siding materials in the United States.

## A PIONEER OF CHANGE

LP has redefined traditional building materials with treated engineered wood products that are designed to offer game-changing durability, beauty and workability. LP is a building industry leader in a category that is shaping the way homes, outdoor building structures, and light commercial properties are being built.

See the innovation that goes into making LP SmartSide products at [YouTube.com/LPSmartSide](https://www.youtube.com/LPSmartSide).

# BECAUSE STRENGTH IS MAKE OR BREAK

---

## A NATURAL DEFENSE AGAINST NATURE

All LP® SmartSide® products are treated to the core through our proprietary SmartGuard® process. With four components of protection, the SmartGuard process adds strength and helps LP SmartSide products withstand impacts, freeze/thaw cycles, high humidity, fungal decay and more.

See more about how LP SmartSide products are made at [YouTube.com/LPSmartSide](https://www.youtube.com/LPSmartSide).

## FOUR COMPONENTS OF PROTECTION

LP's proprietary SmartGuard® manufacturing process ensures that every LP SmartSide Trim & Siding product is treated with an advanced formula of adhesive resins, water-resistant waxes and zinc borate, after which a water-resistant, resin-saturated overlay is bonded to the product. The result: four components of protection against water damage, termites and fungal decay.

## OUTSTANDING IMPACT RESISTANCE

Testing shows that LP SmartSide strand products resist impact better than vinyl and fiber cement siding, which means they can stand up better against everything from everyday bumps to airborne storm debris. And because it doesn't break as easily as fiber cement siding, LP SmartSide strand siding is also easier to handle and install, and results in less waste.

## HAIL AND WIND RESISTANCE

Third-party test results demonstrate that LP SmartSide lap siding resisted hail damage better than fiber cement and vinyl. In fact, the LP SmartSide warranty covers impacts from hail up to 1.75" in diameter. LP SmartSide lap siding is also designed to withstand tough storms with wind gusts of up to 200 miles per hour. Refer to ESR-1301, Table 2B, Lap Siding.

## RESISTANCE TO FUNGAL DECAY AND TERMITES

Since 1996, LP SmartSide strand substrate siding has undergone brutal testing in Hilo, Hawaii. An average temperature of more than 70 degrees, high levels of humidity, and almost 170 inches of annual rainfall make Hilo's climate the perfect breeding ground for termites, moisture and fungal decay. Yet our Exterior Exposure Program continues to validate that LP SmartSide siding performs over time.

## A STRONG WARRANTY BEHIND IT

LP has your back with an industry-leading, transferable limited warranty: a 50-year prorated limited warranty with a 5-year 100% labor and material replacement warranty.

# WORKS THE WAY WOOD IS SUPPOSED TO

---

LP® SmartSide® treated engineered wood siding cuts out the time you spend dealing with warped and split pieces when properly stored and applied. Virtually every piece leaves the mill straight and ready to use. Plus, you'll get lengths up to 16', which may mean fewer seams and less waste to haul off the site.

## MAKES BUILDING EASIER, FASTER, MORE EFFICIENT

LP SmartSide Trim & Siding cuts with standard woodworking tools, unlike fiber cement cladding that recommends expensive diamond blades. LP SmartSide products weigh less, resist breakage during handling, and make installation more efficient. Plus, all LP SmartSide products come pre-primed and ready to paint to help you save time.

## LP HAS WORKABILITY NAILED

- Works and cuts like traditional wood
- Requires fewer tools
- Weighs less, easier to carry, less breakage than fiber cement
- Longer lengths may mean fewer seams and less waste

# GROW WITH US

---

## A SMART CHOICE FOR OUR PLANET

LP® SmartSide® Trim & Siding are must-have materials to help builders qualify for green building programs. Plus, many homeowners and building owners are demanding sustainable products that have minimal impact on our environment.

SUSTAINABLE  
FORESTRY  
INITIATIVE

SFI-00003

We're not just building for the future; we're helping to protect it by using Sustainable Forestry Initiative® (SFI) certified forest management and fiber sourcing systems to help ensure that our wood comes from well-managed forests.

## NATURALLY SUSTAINABLE

The LP SmartSide manufacturing process begins with wood, a renewable resource, grown and gathered under strict SFI standards. We target fast-growing trees and use 99% of the log for either the product or the fuel to make it. Plus, all binding agents and resins are low-emitting.

## RESPONSIBLY MADE WITH WOOD

- Responsibly made with a renewable resource—wood
- 99% of the log is used
- Qualifies for green building programs

## BEAUTY IN EVERY STYLE

---

Siding texture plays a big role in a home's curb appeal. That's why LP® SmartSide® Trim & Siding is available in traditional cedar and smooth finishes that are both built with engineered wood strand technology. So whether you're building a traditional craftsman or a modern masterpiece, you'll be able to deliver the same advanced durability and longer lasting beauty.

## CEDAR TEXTURE PANEL

### RATED FOR STRUCTURAL USE BY APA®

- Shiplap edges with advanced bead system for easier alignment
- Pre-primed for exceptional paint adhesion
- Significantly lighter than comparable fiber cement panel
- Strong enough to be nailed directly to stud, making additional sheathing unnecessary in many applications
- Eliminates need for additional bracing on load-bearing walls
- Ideal exterior for homes in areas of high winds or seismic activity
- Treated engineered wood strand substrate

Cedar Texture

### ALSO AVAILABLE IN FIBER SUBSTRATE

- Not rated for structural use
- Treated engineered wood fiber substrate

# CEDAR TEXTURE SOFFIT

## THE FINISHING TOUCH

- The perfect alternative to MDO and plywood soffits
- Cut-to-width eliminates time spent ripping full sheets
- 38 Series engineered for closed soffit applications
- The 76 Series and 190 Series are ideal for use as the starter course for roofs with exposed eaves
- Treated engineered wood strand substrate

## ALSO AVAILABLE IN FIBER SUBSTRATE.

- Not rated for exposed eave applications
- Engineered for closed soffit applications
- Treated engineered wood fiber substrate

# VENTED SOFFIT

## ENGINEERED TO CUT OUT PROBLEMS

- The perfect alternative to MDO, plywood or hand-installed metal vents
- Precisely cut vents offer 10 square inches of ventilation per linear foot, making it easier to meet code requirements while adding architectural beauty
- Designed to minimize paint buildup and promote continuous airflow
- 1/8" vents to help keep hornets and bees out
- Eliminates time spent ripping full sheets
- Treated engineered wood strand substrate

# START STRONG WITH LP BUILDING SOLUTIONS

## Inventing a Better Tomorrow with LP

LP's mission is to engineer extraordinary solutions for everyday problems. With a united spirit of discovery, LP is forging ahead with innovative ideas to create new products that offer exceptional performance for today's building challenges.

## LP® ArmorStrand® Panel Substrate Under Textured Finish Coatings

LP ArmorStrand substrate is engineered to deliver a strong foundation to help create the look of stucco with durable acrylic finishes. It's toughness you can build on with confidence.

## LP® FlameBlock® Fire-Rated Sheathing

LP FlameBlock Fire-Rated Sheathing has structural design values equal to standard sheathing in the same performance category. ICC-certified (ESR-1365) per AC264 with a Class A and 30-minute Flame Spread Rating (ASTM E84), it combines fire resistance and impressive structural performance in a single panel.

## LP® TechShield® Radiant Barrier

The original, #1 brand of radiant barrier, LP TechShield Radiant Barrier may reduce monthly cooling costs by blocking up to 97% of the radiant heat in the panel from emitting into a home's attic, lowering attic temperatures by up to 30° F.

## LP Legacy® Premium Sub-Flooring

LP Legacy sub-flooring uses Gorilla Glue Technology® for one of the strongest, stiffest sub-floors. The resin in Gorilla Glue Technology binds wood fibers at the molecular level for premium performance.
