## TRESPA - THE ARCHITECTS' CHOICE FOR OVER 60 YEARS

Pura® NFC is designed and created by Trespa, a specialist panelling and siding company headquartered in the Netherlands. Founded in 1960, Trespa is the first choice of exterior panelling for many of the world's leading architects, who insist on quality, reliability and durability for their projects.

# PURA<sup>®</sup> NFC

Pura<sup>®</sup> NFC by Trespa clads buildings in enduring elegance – maintaining its beauty and smooth surface in the face of the elements. The premium façade solution is designed to be durable, low maintenance and easily installed.

and see some of our customer stories.

De Barsy home and office, Boulaide, Luxembourg

Stunning  
for decades

---

PURA® NFC BY TRESPA

Pura® NFC can be the solution for your project if you want it to stand out as an architectural element or to harmonize with the landscape or other building materials. The closed surface created by Trespa's proprietary Electron Beam Curing (EBC) makes it hard for dirt to build up, locking it out and locking in the color. The siding's high impact resistance allows the building to safely withstand daily wear and tear. The siding will keep its hue vibrant and your project exquisite.

High impact and  
scratch resistance

---

## All-season durability

The façade of a building is meant to look good, and it should also protect what's behind it. But what protects the façade? Nothing, unless the materials themselves are manufactured with world-class technology. Pura® NFC by Trespa uses next-generation Electron Beam Curing (EBC) technology to create a closed and smooth surface. The system is built for rough weather and can withstand high impact and scratch resistance. The built-in color stability means Pura® NFC will look good for years without any replacement or refurbishment.

No painting  
or refinishing  
needed

## Hassle-free maintenance

Pura® NFC by Trespa isn't just beautiful; its durability means you do not have to worry about it. The closed surface prevents dirt from building up, making cleaning easy and infrequent. Contaminants like soot, salt, graffiti and permanent markers won't build up and are easy to remove. Your home can keep its vibrant beauty year after year. It's yet another way that buildings with Pura® NFC façades give owners less to worry about and more time to enjoy their home with friends and family. Pura® NFC is an investment in lasting curb appeal.

The closed surface created by Trespa's proprietary Electron Beam Curing (EBC) technology makes it hard for dirt to build up, locking it out and colors in.

Private house, Dartmouth, United Kingdom

Siding is intended to  
be outdoors, after all

---

You want a product that looks great after decades of use. Whether it's salty sea air, wind, rain, humidity or intense sunlight, Pura® NFC by Trespa stands up to the elements. Imagine the beauty of a seaside home without the need for constant repair. Envision your outdoor living space that remains beautiful and inviting regardless of intense sun, humidity or winter conditions. The Pura® NFC system is manufactured for long-lasting performance and beauty – an investment in the future.

Harmonizing  
with nature

PURA® NFC

## A complete solution

Pura® NFC comes with a tailored collection of installation clips, color-matched profiles and fasteners – everything needed to create an evenly hued façade. Every detail can look exactly as it was designed. The siding comes prefinished, but if they need to be fitted for a dormer or eaves, the strength of Pura® NFC means installers can saw without splinters or shattering. Also, the edges don't need sealing – the durability and hue go all the way through. Corners stay sharp, and flats stay smooth.

A photograph of a man with a beard and a white hard hat, looking up at a wall of light-colored vertical siding. He is wearing a dark blue plaid shirt. The background shows green trees.

Install once,  
and be done

---

# No-fuss installation

Pura® NFC is engineered to be used in a ventilated façade solution that's easily installed. The relatively low weight of the prefinished siding makes them easy to slide into place, and their durability means they can handle a rough build site. The combination of durability and ventilation helps Pura® NFC withstand challenging climates.

1. PURA® NFC siding
2. PURA® NFC clip
3. Color-matched profile
4. EPDM
5. Subframe
6. Color-matched fasteners
7. Load-bearing wall
8. Ventilation airflow

*This sketch is intended as a general overview only.*

The system includes an air cavity in front of the load-bearing wall, allowing an airflow that prevents heat or moisture accumulation.
